

THREAT & ATTACK SIMULATION

A Collaborative Approach To Adversarial Assessments

GuidePoint Security’s Threat & Attack Simulation services mimic real-world attacks to help identify exploitable attack vectors in your organization’s IT infrastructure, security control implementations, and human behavior. Our offerings can be customized your specific organizational goals, and we provide guidance on selecting an assessment approach that provides the most value based on your budget, objectives, time constraints, and/or security program maturity levels.

We do our best to make ourselves available throughout the remediation process to provide guidance when requested and to ensure that strengths that we observe in aspects such as patch and configuration management and security monitoring are highlighted in the report.

**Penetration testing often feels like a beatdown.
We’re trying to change that.**

Put an elite team of cybersecurity experts on your side.

GuidePoint’s Threat & Attack Simulation team is staffed by professionals who are technically adept and possess a vast breadth of experience, which enables them to be extraordinarily adaptable to all security assessments. Our standard service offerings include:

Penetration Testing

Social Engineering

Custom Security Assessments

- ➔ Internal and External Penetration Testing
- ➔ Wireless Security Assessments
- ➔ Onsite and Remote Social Engineering
- ➔ Active Directory (AD) Security Reviews
- ➔ Red and Purple Team Assessments
- ➔ Open Source Intelligence Gathering (OSINT)
- ➔ Internal and External Vulnerability Assessments
- ➔ Custom Assessments targeting things like IoT devices and malware controls

Key Differentiators

Operational Experience: Our project teams have been in your shoes, which enables us to provide realistic recommendations and further guidance after the engagement is complete.

Pre-Sales Through Execution: The same team that helps you scope and tailor the project to your needs will deliver the engagement and provide on-going support.

Partnership: After an engagement is complete, we don’t hand you a report and walk away; we haven’t done our job until we see you succeed.

We will work with you to navigate your political landscape, overcome technical hurdles, and best position you to achieve your objectives.

- ✓ **Inventory, Demonstrate, and Prioritize Risks**
- ✓ **Identify and Address Gaps in Policies and Procedures**
- ✓ **Understand Real-World Business Impact**
- ✓ **Realistic, Actionable Recommendations**
