

NGFW AS A SERVICE

Our experts manage your NGFW administration as a service, so your team can focus on security.

Effective Network Security Requires More than Acquiring the Right Tools

There is no one-size-fits-all when it comes to your next-generation firewall (NGFW). With our white glove approach, our highly certified security practitioners tailor your NGFW to meet your unique requirements and environment.

Your Trusted Advisor

In addition to having the right NGFWs, you must also have the right skill set and bandwidth to optimize and manage these tools to ensure your desired security outcomes.

Our team can manage your NGFW environment to help you:

- ✓ Remove/reduce administrative overhead (less expensive than hiring FTEs)
- ✓ Keep your NGFW policies up to date to combat new and emerging threats
- ✓ Ensure your NGFWs are updated to the latest recommended code
- ✓ Optimize your existing policies to ensure an efficient policy set
- ✓ Gain consistent administrative and executive insight by routinely creating actionable reports

Our NGFW as a Service offering includes an initial comprehensive review and planning session to map out best practices assessment and traffic analysis review, along with a 12-month security posture improvement plan.

Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

We are practitioners who live and breathe cybersecurity every day. Our cybersecurity engineers, architects, and consultants have built security programs in the U.S. Federal Government and Fortune 500 companies. They have achieved many of the highest levels of certification across NGFW products and cybersecurity standards.

Hundreds of Industry and Product Certifications

GuidePoint Security NGFW As A Service includes:

Quarterly Best Practices Assessment and Traffic Analysis Review

Our assessment utilizes your existing NGFW configuration and runs analyses to determine if the configuration adheres to best practice recommendations.

Daily/Weekly Automated Reports

We provide reports tailored specifically to your business, giving your administrators and security leaders the necessary information they need in their inbox consistently.

After-Hours Scheduled Maintenance Windows

Our NGFW team of experts is available for scheduled support hours to perform system tuning and upgrades to your firewalls.

Policy Tuning and Support Services

We work with you to understand your business requirements, add, move, and/or adjust existing policies and implement new ones to address your needs.

Optional Emergency Response Retainers

In an incident or unscheduled outage, a retainer can be purchased to engage with a GuidePoint Subject Matter Expert to troubleshoot and support as needed.

**This is not an IR retainer, and DFIR services can not be used for this offering.*

Tiered Service Offering

We offer tiered pricing that not only considers the number of firewalls in scope but also accounts for:

- Deployment type (i.e., data center, perimeter, branch/remote location)
- Number of and complexity of rulesets
- Desired SLA Tier (Tier 1, Tier 2)

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
