

Application Delivery Services Designed to Address Your **Unique Needs**

GuidePoint's consulting organization possesses extensive experience deploying F5 Application Delivery Controllers (ADCs) across all verticals, including both Private and Public Sectors. GuidePoint is uniquely positioned to deliver this service as our industry consultants come from diverse customer backgrounds with experience designing, evaluating, improving, and managing F5 ADC implementations and projects.

GuidePoint Security ADC Services include:

Health Check

We help optimize your F5 ADC environment to meet a set of constantly growing security, operational, and compliance requirements. This service examines your needs, evaluates your current F5 ADC environment, and makes a series of recommendations to get the most from your F5 ADC solution, including:

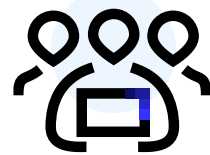

- Best practice recommendations
- Scaling and performance recommendations
- Misconfigurations, security, and performance alerts
- Requirements/Implementation analysis

WAF Implementation

As the number of applications continues to grow exponentially, organizations are challenged to effectively manage the growing risks, protocols and applications. The F5 ADC is continuously evolving with more advanced traffic management capabilities, although many organizations do not have the appropriate people, processes and technologies in place to deliver the required availability, security and performance. We help you by:

- Providing greater visibility into web application security and operations
- Reducing incident remediation time
- Improving your security posture
- Enhancing security, operational, and compliance reporting
- Leveraging advanced incident detection capabilities, such as user behavioral analysis

Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

GuidePoint's highly-certified professionals provide:

- Extensive Cyber Security Experience
- On-Premise and Cloud Application Expertise
- Proven Methodologies
- On-Time, On-Budget Performance

Hundreds of Industry and Product Certifications

Advanced Use Cases & Solutions:

SSL Orchestration (SSLO)

Advanced Firewall Manager (AFM)

- L4 DDoS
- SSH Protection

Access Policy Manager (APM)

- Remote Access/VPN
- Third Party Solution Integrations (Okta, ping, DUO)
- PKI Authentication
- ABAC
- RBAC

Application Security Manager (ASM)

- BOT Protection
- Credential Stuffing
- L7 DDoS
- API Security

BIG-IQ

- Centralized Management
- Lifecycle Management
- License Management
- Analytics

DNS

- Global Service Load Balancing (GSLB)
- DNSSEC
- Enterprise DNS

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
