

“AS A SERVICE” OFFERINGS

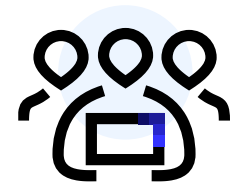

Manage your security posture effectively and efficiently with **our expert teams**

The cybersecurity skills gap has continued to widen, leaving openings for attackers to exploit

GuidePoint Security’s “as a Service” offerings are designed to supplement your existing workforce and security programs, providing the skilled resources your environment requires to stay secure. Our services are delivered as a more flexible alternative to conventional managed services or staff augmentation with accountability, proven results, and operational and platform expertise at their core.

The gap between available and needed cybersecurity practitioners rose by over 12% in the last year, and more than 90% of organizations reported organizational skills gaps negatively impacting their security.*

Our “as a Service” managed offerings are designed to cover critical gaps in your cybersecurity program, ensuring you see the maximum benefit from the investments you’ve made in your tools and platforms. We have experts across every cybersecurity discipline at the ready to help you gain the most value from your security platform with an outcome-based approach. Now your team can focus on other areas of your cybersecurity program.

Put a Highly-Trained, **ELITE** Team on Your Side

Benefits of Our “As a Service” Approach:

- ✔ Real-World Expertise—Our highly certified engineers, analysts, and consultants have built and managed cybersecurity programs across the Fortune 500 and the U.S. Government.
- ✔ One Team—Our services provide a named account team that functions as a true extension of your security team.
- ✔ Flexibility—We use a proven framework and customize tools, processes, and engagements to tailor our services to your requirements and ensure the right outcomes.
- ✔ Cost-Effective—Our services are benchmarked against the costs for you to staff, manage, and maintain the results of the services we provide.

More than 50% of our workforce consists of tenured cybersecurity engineers, architects and consultants. We have in-house expertise on the platforms and tools that we manage to help you:

- ✔ Create Program Efficiencies
- ✔ Reduce Technical Debt
- ✔ Increase Solution ROI
- ✔ Maintain Regulatory Compliance
- ✔ And much more

Our practitioners' expertise serve as the backbone of our "as a Service" offerings, which are built from the ground up to meet your organization's specific needs.

 **Application Delivery** - Leveraging F5's advanced suite of tools, we provide your environment with enhanced security, streamlined traffic management, optimization, IAM, as well as compliance and governance adherence.

 **Application Security** - Leverage our expertise, regardless of the size of your development organization, to effectively launch your application security program or evolve and mature your program over time.

 **Breach and Attack Simulation** - We ensure your tools are configured and integrated properly, deploy sensors to optimize your BAS and Threat Emulation program, and perform ongoing management and testing optimization.

 **Compliance Management** - We take on the management of your organization's compliance program to ensure you stay on top of required activities and maintain the necessary data to support future compliance assessments.

 **Virtual CISO** - Our most experienced consultants can augment your organization's security leadership. All of our consultants have strong leadership backgrounds and are experienced in engaging with executives.

 **Identity and Access Management** - Offers a robust solution for the complex challenges of identity management to optimize resources, enhance the user experience, and ultimately ensure an improved security posture.

 **NGFW** - Delivers an initial comprehensive review and planning session to map out best practices related to your firewall traffic analysis, and ongoing operations with regular reviews to maintain your policies and practices.

 **Penetration Testing** - Combines advanced and highly customized penetration testing and reporting, with recurring, automated penetration testing and reporting to deliver real-time, actionable results.

 **Phishing** - By combining real-world experience with industry-leading training platforms, we ensure your phishing simulations help your employees to properly identify and respond to current phishing techniques.

 **Security Analytics** - We can tailor your security analytics platform to best fit your environment, meet your requirements and maximize value, enabling you to spend less time on administration and management.

 **Third-Party Risk Management** - Onshore risk and security experts have deep vendor experience with many of the leading solutions to help you identify and address risks within your vendor population.

 **Threat Hunting** - Supplement your MDR or Threat Hunting capabilities with our IR experts who leverage your existing toolsets and data sources to look for indicators of threat actor activities on an established cadence.

 **Threat Intelligence** - Cover your entire Threat Intelligence program needs with customizable service offerings, including Exposure Management and Threat Intelligence Platform Management.

 **Vulnerability Management** - We provide the expertise, process efficiency, and technical knowledge to elevate your VM program that fits your unique technologies and requirements in a fully or partially managed structure.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
