GUIDEPOINT® SECURITY

Arm your team with a curated and vetted source of actionable Threat Intelligence

High Quality, Actionable Intelligence is an Essential Component of an Effective CTI Program

Through curated intelligence from both OSINT and proprietary threat research sources, the GRIT Threat Feed allows you to incorporate high quality, actionable threat intelligence into your tools and processes to enhance your existing cybersecurity program.

Combatting modern threats requires the best intelligence possible

In order to provide the necessary context and prioritization for threats and vulnerabilities, CTI teams need high quality, timely, and actionable threat intelligence to be directly integrated into cybersecurity tools and processes. The GRIT Threat Feed includes a curated dataset that focuses on providing critical intelligence of the following types:

- ⊘ Domains and Subdomains
- ⊘ IP Addresses
- ⊘ Hashes (MD5, SHA1, SHA356)
- ⊘ URLs
- ⊘ Email Addresses
- ⊘ File/Registry Paths

Intelligence provided via the GRIT threat feed undergoes a rigid curation process by GRIT analysts to ensure that only the highest fidelity, enriched intelligence is fed into your cybersecurity tools and processes to identify, prioritize, and respond to active threats within your environment.

Rapidly Prevent and Respond to Threats

GRIT's Threat Feed is updated regularly, and provides a consolidated data source that can be consumed by any tool or process that supports STIX/TAXII.

With the GRIT Threat Feed you can prevent and respond to threats such as:

- ⊘ Phishing Attacks
- ⊘ Malware Loaders
- ⊘ eCrime Trojans
- ⊘ Ransomware
- ⊘ Hack Tools and Utilities
Let our ELITE Team be your ELITE team

GuidePoint Security's dedicated Threat Intelligence team allows you to utilize expert threat intelligence resources as an extension of your cybersecurity team.

Hundreds of Industry and Product Certifications

Keep the Blue Team in the game with Threat Intelligence that moves as fast as threat actors

Our customers receive access to GRIT's near real-time feed, providing intelligence from GRIT's proactive threat research and anonymized, real-world DFIR investigations. The GRIT Threat Feed is updated as intelligence is discovered, so that your tools get the most up to date intelligence on your organization's preferred cadence.

Additionally, Threat Feed customers receive curated threat bulletins from GRIT highlighting critical threats and vulnerabilities as they happen.
