

IDENTITY & ACCESS MANAGEMENT LIFECYCLE SERVICES

Manage User Access to Critical Information and Systems While Enabling Business Agility

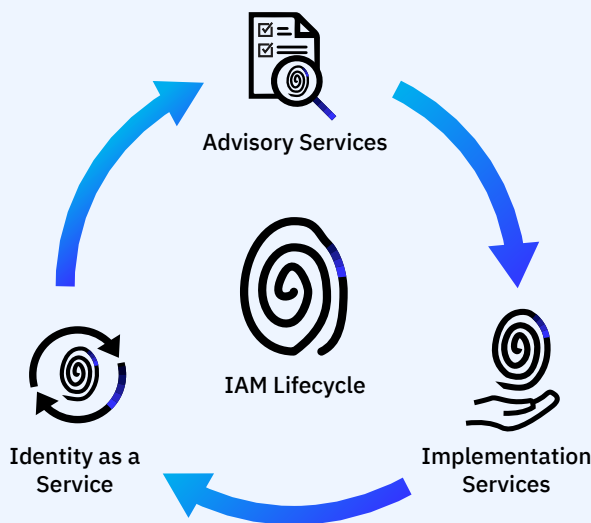

IAM is a key business enabler and fundamental to conducting business securely.

We can help you realize a return on investment and gain value from your Identity Access Management program through our attribute-based approach to assess, design, strategize, and implement IAM solutions that are best fit for your business.

Robust Lifecycle Management Services

By combining the expertise of our engineers and practitioners with leading solutions, our IAM practice helps you manage user access to critical information assets and improve productivity. Our capabilities span Identity Governance & Administration, Access Management, Customer Identity & Access Management, and Privileged Access Management.

GuidePoint Security provides IAM full lifecycle services, from strategy to implementation, to managed services:

Put a **TRUSTED** Team of Cybersecurity Practitioners on Your Side

We understand that delivering successful IAM programs requires key personnel like business analysts, architects, and developers, as well as functional expertise in key lifecycle and compliance-related processes. Our team of certified experts has assisted organizations across various industries with designing and implementing large-scale IAM projects.

Hundreds of Industry and Product Certifications

Advisory Services:

- Strategy
- Optimization
- Roadmap

Implementation Services:

- IGA
- PAM
- AM/CIAM

Identity as a Service:

- Operational Support
- Advisory Services
- Program Reporting

IAM Offerings and Capabilities:

GuidePoint Security covers Identity & Access Management with Advisory, Implementation, and Managed Services. We help you evaluate, acquire, implement, and manage the right technology solutions.

Advisory Services

Our Advisory Services process is based on collaborating closely with you to develop a personalized identity strategy, craft a roadmap tailored to your unique needs, and offer optimization services that evolve with your organization's cybersecurity landscape.

Identity Governance & Administration (IGA)

We help deploy Identity Governance & Administration solutions to reduce operational costs and enhance security, focusing on automating user lifecycle processes, efficient provisioning and de-provisioning, and improving access certification for a better user experience.

Access Management (AM)

We assist in selecting and deploying access management solutions that secure your critical business applications and assets, offering capabilities like single sign-on, multi-factor authentication, and federated single sign-on for robust authentication and authorization.

Privileged Access Management (PAM)

We guide you in selecting and deploying Privileged Access Management (PAM) solutions that not only secure privileged user access but also enforce access policies and ensure compliance with regulations, effectively governing the lifecycle of privileged users.

Customer Identity and Access Management (CIAM)

We guide you through the Customer Identity and Access Management (CIAM) implementation process, focusing on streamlining user registration, enhancing data security and compliance, and gaining valuable customer insights.

Identity as a Service (IDaaS)

Our IDaaS Solution provides a comprehensive managed security portfolio for your Identity and Access Management program, encompassing Access Management, Customer Identity and Access Management, Identity Governance & Administration, and Privileged Access Management.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
