

TECHNOLOGY SOLUTIONS

Enabling Cybersecurity Technologies to **Protect** Your Organization

Today's technologies and cybersecurity requirements are always evolving

Whether you are integrating technology, attempting to manage your applications, understanding your gaps, and what solutions can fill them, or getting your solutions to talk to each other, we have the skills and certifications to help.

We all face several challenges with the current technology solutions we either have in place or are looking to implement in our environments.

Our wealth of real-world operational knowledge enables us to bring you an agnostic approach to solutions and weed out what works and what doesn't work for your environment.

We are security practitioners and understand how your security programs can be optimized or augmented using flexible, client-centric approaches to meet your requirements and goals.

How We Help

- ✓ GuidePoint's Technology Solutions team excels at providing holistic support throughout any and all technology solution life cycle phases.
- ✓ Whether you need help with solution selection, initial implementation expertise, or assistance with optimization and operationalization, we can assist.
- ✓ Our support ranges from the highly strategic to the in-depth tactical support and everything in between.

Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

GuidePoint Security offers comprehensive technology integration services and a wide selection of cybersecurity technologies to protect your organization.

Hundreds of Industry and Product Certifications

 Governance, Risk & Compliance

 Identity & Access Management

 Managed Security Services

 Network & Infrastructure Security

 Security Operations & Incident Response

 Automation and Orchestration

 Container Security

 Vulnerability Management & Penetration Testing

 SOC Services

GuidePoint's Technology Solutions services include:

Architecture and Design

Our architecture and design review creates a roadmap for your cybersecurity projects, including technology recommendations, identification of older technologies that should be retired or replaced; efficiency use recommendations for technologies and resources; and a summary of security concerns.

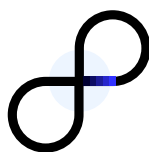

Security Architecture Review

GuidePoint will provide you with an in-depth assessment that provides senior leadership with a comprehensive technical review. We focus on numerous areas of your network security, email, and more.

Implementation

Knowledgeable and experienced professionals are available to install technologies for you, including configurations, to ensure safeguards. We take on the implementation process to ensure that it gets done right the first time and meets your outcome standards.

Optimization

Technologies are not created equal, and what works for one will most likely not work for the other. Our team will work to ensure your technologies are working at the best possible level with resources available. Our mission is to make sure they perform as intended and provide your organization with the protection it needs.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
