

The Never-ending Game

THE WINNING STRATEGY:
6 STEPS TO BUILDING A BETTER SECURITY PROGRAM

GPVUE
SECURITY PROGRAM

Tired fragmented approach causes...

Bloated, underutilized tool sets

Alert **fatigue and overworked** personnel

Lack of organizational buy-in for cybersecurity

A feedback loop of cybersecurity programs that are **caught in a never-ending game of catch-up**

Core problems of the traditional approach to cybersecurity programs are now exposed.

“How do we fix it?”

Take Inventory
Know your security environment

Assess
What’s the level of maturity of each security practice in your organization?

Identify
What are the gaps in your security program?

Prioritize
Make better risk-based decisions for how to move forward

Implement
Optimize existing technologies or purchase new tools

Test Continuously
Engage your program to keep your teams and personnel in peak form, but more importantly to measure and report on the success of your improvements.

GPVUE is a strategic, programmable cybersecurity approach that goes beyond individual solutions and services to give you a more mature security program and posture.

See Why **GPVUE is Right** for Your Organization

It’s time to re-evaluate how you approach your cybersecurity program. Know more about how security programs must shift to a more cohesive and continuous approach from reading our latest publication. We outline six ways to help you build a strong, cohesive and focused cyber program.
