

APPSEC AS A SERVICE OVERVIEW

Your AppSec solutions require significant bandwidth and the **right skills** to manage properly.

We can utilize your tools and integrate with your organization's processes to ensure optimal program health.

Our AppSec service scales up or down based on your unique requirements. For example, you can leverage our team to help with implementation or integration assistance or extend the offering into full application security program support.

Finding qualified application security professionals is no easy task.

With our AppSec as a Service offering, we enable you to effectively launch your application security program and evolve and mature your program over time. Now you can:

- Achieve dramatic cost savings vs. hiring in-house AppSec specialists
- Fluid Approach with built-in SLAs for client requests
- Gain in-depth analysis related to the security of your critical applications
- Seamlessly extend your team with our experts
- Enjoy a white-glove service approach that is tailored to meet your unique needs and SLAs
- Expand testing coverage across your application portfolio
- Help you meet application security testing compliance or audit requirements

Our team of experts can manage your AppSec program to help you implement best practices, minimize your workload, and maximize your productivity.

- ✓ Optimize and automate your environment to deliver a scalable and effective testing approach
- ✓ Perform software upgrades, troubleshooting, and onboarding of new applications
- ✓ Perform comprehensive and consistent testing of applications
- ✓ Validate findings and work with development teams and provide remediation recommendations
- ✓ Ensure multiple rounds of testing for in-scope applications
- ✓ Integrate with ticketing, monitoring, and incident response platforms

Put an **ELITE** Team of Cybersecurity Practitioners on Your Side

Our highly-certified, operational cybersecurity experts have lived and breathed your job. We will help you:

- **Reduce friction** and optimize operational overhead by integrating and automating security tooling directly into your CI/CD pipeline or Secure SDLC.
- **Build integrations** with source code management, IDE, and other IT systems, including ticketing, logging, monitoring, incident management, or GRC platforms.

GuidePoint Security's Application as a Service includes:

Implement AppSec Best Practices

Our team of experts can manage your AppSec program to help you implement best practices, minimize your workload, and maximize your productivity. We help you:

- Optimize and automate your environment to deliver a scalable and effective testing approach
- Perform software upgrades, troubleshooting, and onboarding of new applications
- Perform comprehensive and consistent testing of applications
- Validate findings and work with development teams and provide remediation recommendations
- Ensure multiple rounds of testing for in-scope applications
- Integrate with ticketing, monitoring, and incident response platforms

We Can Manage Your AppSec Program

Finding qualified application security professionals is no easy task. With our AppSec as a Service offering, we enable you to effectively launch your application security program and evolve and mature your program over time. Now you can:

- Achieve dramatic cost savings vs. hiring in-house AppSec specialists
- Fluid Approach with built-in SLAs for client requests
- Gain in-depth analysis related to the security of your critical applications
- Seamlessly extend your team with our experts
- Enjoy a white-glove service approach that is tailored to meet your unique needs and SLAs
- Expand testing coverage across your application portfolio

Tiered Service Offering

Our AppSec as a Service offering is tiered based upon the following criteria:

- The amount of configuration or implementation needed (if any)
- The amount of code or number of applications and approximate number of retests per month, quarter, or year
- Duration of service
- Desired workflow and automation integrations into your IDE and/or CI/CD Pipeline
- If your Application Security tool environment is on-prem or in your cloud environment, we can manage it from end to end

Support for Many AppSec Testing Capabilities and Activities

Our AppSec as a Service encompasses support for many different types of tools within the Application Security space. Our capabilities include the following technology types:

- **Software Composition Analysis (SCA)**
- **Static Application Security Testing (SAST)**
- **Dynamic Application Security Testing (DAST)**
- **Interactive Application Security Testing (IAST)**
- **Run-Time Application Self Protection (RASP)**
- **Next-Gen Web Application Firewall (NGWAF)**

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
