

THREAT INTELLIGENCE ADVISORY SERVICES

Threat Intelligence maturity requires deliberate planning to ensure that the value of your intel program is realized

Implementing and improving threat intelligence programs can be a complex and time consuming process.

From requirements development through program implementation, GRIT's threat intelligence methodology and experienced practitioners leverage industry best practices, qualitative and quantitative analysis, and customized implementation guidance to build and enhance threat intelligence programs at all maturity levels.

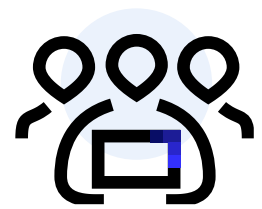

Building and maturing a threat intelligence program can be a daunting task. From establishing program and intelligence requirements to technology selection and process design, there are a seemingly infinite number of tasks and processes that need to be defined and completed, all while showing the strategic, operational, and tactical value of threat intelligence to the organization.

GRIT's Threat Intelligence Advisory Services leverage years of proven threat intelligence knowledge and expertise to meet your threat intelligence team where they are now and assist them with getting to where they want to be.

Key Components:

- ✓ Identify program and intelligence requirements as a means for establishing the foundation of a threat intelligence program
- ✓ Build a comprehensive threat intelligence program with a focus on strategic, operational, and tactical intelligence capabilities
- ✓ Qualitatively and quantitatively assess threat intelligence maturity based on GRIT's threat intelligence matrix
- ✓ Conduct regular threat briefs to educate organizations of the current threat landscape for specific industry verticals
- ✓ Incorporate threat actor communications into the organization's incident response plan

Establishing and maturing threat intelligence doesn't have to be a reactive or overwhelming process. Allow GRIT's threat intelligence experts to customize and deliver a tailored experience that ensures long term threat intelligence success.

and Product Certifications**

Threat intelligence maturity requires a deliberate, methodical, and dynamic approach to ensure long-term success

Threat Intelligence Advisory Services

Threat intelligence maturity comes as a result of successfully executing key threat intelligence plans and program initiatives. GRIT's Threat Intelligence Advisory Services give you qualitative and quantitative maturity ratings that allow you to make tactical and strategic threat intelligence program decisions that keep you moving in a positive direction. GRIT's experts leverage years of experience, and industry best practices to understand your organization's threat intelligence goals and help you achieve them.

Threat Intelligence Program Development

Building a functional Threat Intelligence program can be a daunting task. GRIT's experienced analysts build a customized Threat Intelligence program, from requirements through implementation, that will grow as your team matures into an invaluable cybersecurity and risk management resource.

Threat Intelligence Assessment

Maturing an effective Threat Intelligence program can be a lengthy and involved process. Understanding your current maturity level is essential for the prioritization of strategic, operational, and tactical initiatives that have a direct impact on Threat Intelligence maturity and an organization's security posture. GRIT's Threat Intelligence Assessment leverages a qualitative and quantitative methodology that evaluates your Threat Intelligence Program's maturity and provides a roadmap focused on improving threat intelligence capabilities.

Threat Intelligence Maturity Services

Threat intelligence maturity comes as a result of successfully executing key threat intelligence plans and program initiatives. Our threat intelligence experts leverage years of experience, and threat intelligence best practices to understand your organization's threat intelligence goals and help you create a plan to achieve them.

Threat Briefs

Eliminate the complexity of external threat intelligence with actionable forecasts and relevant briefings on regular intervals so your organization is ready for both today and tomorrow's threats.

Threat Modeling

Understanding what threats are most relevant and how they would impact your business can be a taxing ordeal. GRIT uses systematic threat modeling techniques to evaluate and prioritize your organization's threats based on industry vertical, technology stack, and current threat landscape.

Threat Actor Communications

Having a threat actor communications strategy is an important aspect of an organization's capability to respond to ransomware and extortion-focused attacks. Whether your strategy is to gain enough information and time to help your business and technology teams recover, or to negotiate a lower payment, our ransomware negotiators will leverage an agreed upon and effective strategy for achieving the best possible outcome. We can perform these tasks as ad hoc services or via a retainer.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
