

THREAT INTELLIGENCE PLATFORM (TIP) SERVICES

It is essential to **integrate contextualized and actionable** threat intelligence into your existing cybersecurity processes

Managing a TIP requires time and experience for which most organizations do not have capacity.

Learning, managing, and tuning a Threat Intelligence platform can be a nuanced and involved task. GRIT's experienced analysts stand ready to deploy, implement, and manage your Threat Intelligence Platform so that your analysts can focus on effectively ingesting, analyzing, and disseminating Threat Intelligence to improve your cybersecurity posture.

A Threat Intelligence Platform is a key technological component of a successful threat intelligence program, specifically from the perspective of data ingestion, deduplication, and normalization.

The TIP should be the single source of truth of your threat intelligence program. However, if an organization lacks the resources and ability to operationalize the intel, it can be difficult to maximize program success.

GRIT understands the value of people, process, and technology and that different teams are at different levels of maturity. Through GRIT's Threat Intelligence Platform Services, we can act as an extension of your team to complete the following tasks:

- ✔ Threat intelligence platform management and administration
- ✔ Threat intelligence integration, automation, and orchestration
- ✔ Threat intelligence consumption
- ✔ Indicator deprecation and management
- ✔ Intelligence routing and rules development

As threats and vulnerabilities continue to emerge at a rapid cadence, it is crucial for the threat intelligence team to focus on providing contextualized and prioritized intelligence at all levels of the organization. GRIT's analysts stand ready to take on critical TIP tasks and processes so that your threat intelligence team can focus on doing what's important.

Let Our **ELITE** Team be Your **ELITE** Team

GuidePoint Security's dedicated Threat Intelligence team allows you to utilize expert threat intelligence resources as an extension of your cybersecurity team.

Hundreds of Industry and Product Certifications

Maximize your Threat Intelligence capabilities with GRIT as a force multiplier for your Intel team

Threat Intelligence Platform Services

The Threat Intelligence Platform and threat feeds are often some of the most critical technology components of a successful intel program. Unfortunately, they can also be some of the most challenging platforms to manage. GRIT's Threat Intelligence Platform Services provide dedicated and experienced analysts to manage your TIP, threat feeds, and ensure that the proper rules and integrations are in place to provide immediate value to an organization's cybersecurity posture.

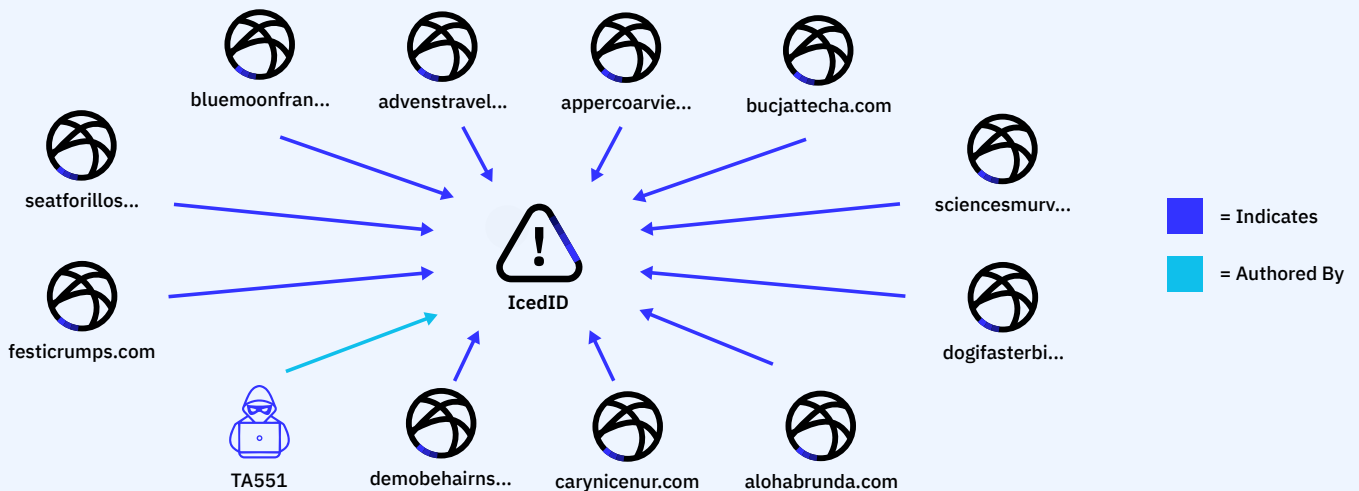

Threat Intelligence Platform Management

Managing yet another security platform can be a daunting task for many security teams. Our team of threat intelligence analysts stands ready to deploy and manage your threat intelligence platform and threat feeds with as much, or as little, involvement as you want.

GRIT Threat Feed

Intelligence provided via the GRIT threat feed undergoes a rigid curation process by GRIT analysts to ensure that only the highest fidelity, enriched intelligence is fed into your cybersecurity tools and processes to identify, prioritize, and respond to active threats within your environment.

About Us

GuidePoint Security provides trusted cybersecurity expertise, solutions and services to help organizations make better decisions that minimize risk. GuidePoint's unmatched expertise has enabled a third of Fortune 500 companies and more than half of the U.S. government cabinet level agencies to improve their security posture and reduce risk.
